Übersicht Blockkurse UZH im Frühlingssemester 2027 (provisorisch)

1. Viertel	2. Viertel	3. Viertel	4. Viertel
Blockkurse im Wahlpflichtbereich 2 Biomedizin			
BME 351 Biomedical Data Mining	BME 305 Methods in Exp. and Clinical Pharmacology	BME 302 Systems Neurobiology	BME 306 Experimental Human Studies
BME 353 Human Brain Activity and the Mind	BME 332 Metabolic Medicine	BME 321 Project design, causal inference and workflow management	BME 331 Tissue Imaging
BME 357 Diseases at the animal human interface	BME 366 Medical Immunology	BME 326 Evolution of Bacterial Pathogens	BME 354 Forensic Toxicology
BME 361 Randomised trials – From lab experiments to large preventive trials	BIO 245 Cell signaling	BME 329 Developing New Medicines: Introduction	BME 356 Molecular Endocrinology and Metabolism
BME 362 Rare genetic pediatric disorders	BIO 247 Genome Stability & Mol. Cancer Research (Biochem.)	BME 348 Journey into Medical Research	BIO 334 Practical Bioinformatics
BME 363 Gene therapy from bench to bedside	BIO 256 Precision Oncology	BME 352 Auditory Biomechanics	BIO 413 Genome modification in mammal
BME 369 Diffusion weighed imaging and tractography in clinical neuroscience	BIO 258 Cancer, Immunotherapy and Inflammation Research	BIO 255 Finding and Solving Interesting Problems in Molecular Life Sciences	BIO 392 Bioinformatics of Molecular Sequence Variation
BIO 248 Functional assess. of human spinal cord injury	BIO 296 Microbial Bioinformatics	BIO 442 Evolutionary Medicine: Health and disease in modern humans	BIO 446 Applied RNA Methodology
BIO 407 Advanced Microscopy	BIO 374 Virology: Biology of Virus Infection and Evolution		BCH 308 Experimental biochemistry (group 2)
BIO 328 Neurobiology			
	BIO 431 Cell Death and Inflammation		
	BCH 309 Experimental Biochemistry (group 1)		

Allfällig weitere Module und alle Informationen und Erläuterungen zu den Modulen (Inhalte, Voraussetzungen, Zielgruppe, etc), finden sich im Vorlesungsverzeichnis der UZH**:** https://studentservices.uzh.ch/uzh/anonym/vvz/index.html

10.8.26
