

Übersicht Blockkurse UZH im Herbstsemester 2026

Anmeldung online 20. Juli – 7. August www.mybioportal.uzh.ch

1. Viertel 15.09. – 07.10.26	2. Viertel 08.10. – 30.10.26	3. Viertel 03.11. – 25.11.26	4. Viertel 26.11. – 18.12.26
Blockkurse im Wahlpflichtbereich 2 Biomedizin			
BME 307 Microbiomes in health and disease	BME 304 Vital Functions: Measurements on the Human Body	BME 312 Epigenetics and Disease	BME 308 Human Molecular Genetics
BME 310 Research Methods for Studies on Human Health & Disease	BME 313 Cardiac and Vascular Pathophysiology	BME 315 Diseases of Autonomous Systems: Metabolism and Cellular Adaptation	BME 319 Prospects of Molecular Diagnostics in Pediatrics
BME 314 Inflammation and Immune Response	BME 345 Biomaterials and Applied Technologies in Dentistry	BME 330 Quantitative Biomedicine	BME 350 From stem cell to full tissue analysis
BME 323 Brain disorders	BME 346 Tissue Engineering of the Skin	BME 334 Applied statistics for biomedicine and biology: advanced linear models	BME 368 Translational Medicine in Neuroscience and Infection
BME 336 Muscle and Bone Bioengineering	BME 349 Immune disorders and assessment	BME 364 Mechanisms of allergic disease	BIO 204 Human Evolutionary Eco-Physiology
BME 342 Deep Learning in Biomedicine	BIO 208 Current debates in Evol. Biol. and Human evolution	BME 365 Cellular Modelling of Neuropsychiatry	BIO 320 Sleep and Wake Regulation
BME 355 Pain – Mechanisms and clinical presentations	BIO 246 Genome Instability and Molecular Cancer Research	BIO 230 Cancer Stem/ Propagating Cells and their Microenvironment	BIO 409 Veterinary Medicine: comparative physiology, pathophysiology and research
BME 358 Animal disease models in modern biomedical research	BIO 250 Drug efficacy and pathway assessment in pediatric brain cancer models	BIO 253 Research Cycle in Genomics	BIO 430 Immunology
BIO 210 Human Behavioural Ecology and Cultural Evolution	BIO 282 Methods in Molecular Plant Biology	BIO 284 Systemic Microbiology	BIO 434 Electro-Physiological Recording Techniques
BIO 258 Cancer, Immunotherapy and Inflammation Research	BIO 322 Cell Biology of Viral Infections	BIO 319 Cell motility control in invasive brain tumors	BIO 445 Quantitative Life Sciences
BIO 299 Parasites – from Genes to Systems	BIO 325 Systems Dynamics in Cell and Dev. Biology	BIO 372 Virology: Methods in Molecular Biology, Pathogenesis and Control of Human Viruses	
BIO 317 Advanced methods in genomic and cellular manipulation	BIO 411 BioEntrepreneurship and Innovation Program	BIO 440 Evolutionary Medicine: Morphological changes and pathologies	
BIO 321 Modern Microscopy in Life Science research	EEE 340 From Values to Arguments: Ethics in Environmental and Human Rights Discourse	BIO 323 Modern Genetics and Genomics	
In der vorlesungsfreien Zeit (18.1.-5.2.2027): BIO260 Molecular Biology Course for Biology and Medicine			

Allfällig weitere Module und alle Informationen und Erläuterungen zu den Modulen (Inhalte, Voraussetzungen, Zielgruppe, etc), finden sich im Vorlesungsverzeichnis der UZH:

<https://studentservices.uzh.ch/uzh/anonym/vvz/index.html>
